

Oöna Testimonials

“ I am reordering another box of Oöna. I cannot believe the difference it has made in just 3 weeks. I don't break into sweats and toss and turn and kick off my covers and disturb my husband. I don't feel like my skin is on fire. It has just been an amazing miracle and I thank you for such a wonderful product. I just turned 50 last month and all of a sudden I lunged into menopause as if a timer went off in my body. Now, 30 days later I am back to my comfortable self. Thanks.”

Micki Fagerberg, Vero Beach, Florida

“ Oöna works! I tried all the herbal products I could get to try and relieve my hot flashes, night sweats and mood swings. Oona does what it says it will do. My menopausal symptoms are gone. Thank you Oöna!

Diana Hausman, Shelter Island, New York

“ This product has worked miracles, my hot flashes are way under control and so are the migraines. Thank You!”

Deborah Goronson, Beach Park, Illinois

“ Ever since I first experienced menses, I have felt at war with my own body once a month. Over the years, that conflict has only intensified. Most of us are familiar with the laundry list of yucky symptoms but the one that stands out most for me is the sense of disconnect from myself every 28 days. What Oöna does for me is to smooth out the symptoms so that I feel like a real person again, not someone in a fight with myself to manage an array of unpleasantness each month. How I wish this product had been in my cabinet for the last 30 years! There is also no sense of being drugged, nor is there any sense of a high. The feeling is simply that you no longer have to fight or manage!”

Susan Shelton Carr, Minneapolis, Minnesota

“ I have been taking your product for a couple of months now and I am very satisfied. I initially was having a lot of night and day sweats and resorted to acupuncture for a while, which worked nicely, but it was inconvenient to keep going to appointments. I started taking 2 tablets 3x daily for about 3 weeks and was able to keep things under control. I am now down to 2 tablets daily and I am maintaining. Occasionally I'll have a flare up and will just take an extra tablet for a day or two and that seems to work great. Thank you for your great product.

Lynn Reinhardt, New Fame, Vermont
